

EVERY MOVE — MOVE, CHARGE, BREAK, LISTEN

1 · Captain

Shout "Heading North" (or East, South, West). Draw 1 dot of route.

2 · First Mate

Mark 1 empty box on any gauge. Say "OK".

3 · Engineer

Cross out 1 symbol in the panel matching the direction. Say "OK".

4 · Enemy Radio Op

Draw 1 step in that direction on the clear sheet.

The Captain calls the next move only after hearing both OKs. No turns: both subs move as fast as their crews allow.

CAPTAIN

STEER · ATTACK

- ◆ Before play, draw a secret X on any water dot. Both Captains shout "Dive!" to start.
- ◆ Move 1 dot North, East, South or West. Never diagonally.
- ◆ Never leave the map, enter an island, or enter any dot your route already touches.
- ◆ **Blackout:** if no legal move exists, surface immediately.
- ◆ You activate Torpedo, Mine and Silence, detonate Mines, and call Surface.
- ◆ Answer enemy hits and Drones truthfully, at once. Sonar: give 1 true fact, 1 false.

FIRST MATE

CHARGE · SCORE

- ◆ Each move, mark 1 box on any gauge. Charge what the Captain asks for.
- ◆ When a gauge fills, shout "Torpedo ready!" (or the system's name).
- ◆ A full gauge stays full until used. Erase the whole gauge after each use.
- ◆ You activate Drone and Sonar.
- ◆ Keep score: cross 1 Damage box (top right) per damage. 4th box = sunk.
- ◆ Ignore the Scenario gauge on the Alpha map.

ENGINEER

BREAK · REPAIR

- ◆ Each move, cross 1 symbol in that direction's panel. Say "OK".
- ◆ 1+ crossed symbol of a color breaks both systems of that color. Broken systems still charge but can't be used.
- ◆ Ordering a broken system fails; cross 1 radiation symbol as a penalty.
- ◆ **Repair:** when all 4 symbols on one circuit line (top half) are crossed, erase those 4.
- ◆ **Damage:** a full panel, or every radiation symbol crossed = 1 damage. Shout "Damage!", then erase your whole sheet.
- ◆ Repair beats damage when 1 mark causes both.

RADIO OPERATOR

LISTEN · TRACK

- ◆ Start with a dot in the center of the clear sheet. Draw every enemy move.
- ◆ Slide the sheet over the map. Their route can't cross islands or itself. It resets when they surface.
- ◆ Log every clue: Silence (≤4 dots straight, direction unknown), Torpedo impact (enemy ≤4 dots from it), Surface sector, Drone and Sonar answers.
- ◆ While your own sub is surfaced, you can't write. Memorize enemy moves.
- ◆ Lost the trail? Erase and restart from the latest clues.
- ◆ Tell the Captain your best guess, constantly.

SYSTEMS

Engineer colors: Red = Mine + Torpedo Green = Drone + Sonar Yellow = Silence (+ Scenario)

SYSTEM	WHO	EFFECT
Torpedo	Captain	Pick a dot up to 4 orthogonal steps from you. Announce "Torpedo, impact C6!" It explodes there.
Mine	Captain	Drop: draw M on a dot next to you, not on your route. Say "Mine dropped!" Detonate later, any time: "Stop! Mine at G7!" Detonating needs no gauge and isn't an activation. Any red breakdown blocks it. Mines survive surfacing.
Drone	First Mate	Ask about 1 of the 9 sectors: "Are you in sector 5?" Enemy answers yes or no, truthfully.
Sonar	First Mate	Enemy names 2 facts of different types (row, column, sector): 1 true, 1 false. Example: at N12 in sector 9, say "Column N, sector 7."
Silence	Captain	Move 0–4 dots in a straight line without saying the direction; show the Engineer by thumb behind the screen. Still a move: First Mate marks 1 box, Engineer marks 1 symbol (fakes it on 0). Route rules apply.

STOP! — ACTIVATE

1. Gauge full, and the Engineer confirms no breakdown of that color.
2. Raise a fist, shout "Stop!" Everyone lifts pens and listens.
3. Name the system and resolve it. First Mate erases that gauge.
4. Resume play.

Move at least once between 2 activations.
Mine detonation and Surface don't count as activations.

EXPLOSIONS & DAMAGE

2 Direct hit — explosion on the sub's dot.

1 Indirect hit — on 1 of the 8 surrounding dots.

0 Clear — 2+ dots away.

1 Engineer — full panel or all radiation crossed.

- ◆ Your own Torpedo or Mine hurts you too.
- ◆ Torpedo on a Mine destroys it. Torpedo next to a Mine sets it off (Torpedo resolves first).
- ◆ Announce all damage, even self-inflicted. 4 damage = sunk.

SURFACING

- ◆ Captain raises a fist: "Surfacing in sector 6!"
- ◆ **Clears:** all breakdowns; the route (keep current dot and Mines). **Keeps:** damage, gauges.
- ◆ Each crew member traces 1 of the 4 sub sections inside the double hull and initials it.
- ◆ Enemy Engineer checks it; any line over the hull = redo.
- ◆ Erase it, say "Ready to dive!", Captain shouts "Dive!"
- ◆ While up: no systems; Radio Op can't write. The enemy keeps moving.
